Installation – Hot-Applied Mastic Repairs

Site Preparation

The joint or crack shall be milled with an approved milling machine to the specified width and depth. The pothole or spall shall be milled, saw cut and jack hammered, or cored and jack hammered to remove the defective areas. Repair surfaces are cleaned and dried with a hot air lance.

Application of Primer CP

Recessed areas and vertical walls are treated with Primer CP in a thin layer to sound concrete that is clean, dry, and free of contaminants. Apply a slight over-band to the surface surrounding the repair. Do not allow puddles to form. FPT Infrastructure mastic materials may be applied once Primer CP has dried, which may be less than 15 minutes.

Limitations/ Shelf Life

Five (5) years when stored in a dry place in original, closed packaging. Store in original container. Keep locked up or in an area accessible only to qualified or authorized persons. Store in a dry, well-ventilated place away from sources of heat, ignition and direct sunlight.

Warranty

FPT Infrastructure warrants its Products to be free of defects in materials but makes no warranty as to appearance or color.
